

Questions ☐

1. Take 2 integers input and print the greatest of them.
2. Given the radius of the circle predict whether numerically area of this circle is larger than the circumference or not.
3. Any year is input through the keyboard. Write a program to determine whether the year is a leap year or not. (Considering leap year occurs after every 4 years)
4. Given the length and breadth of a rectangle, write a program to find whether numerically the area of the rectangle is greater than its perimeter.
5. Write a program to input sides of a triangle and check whether a triangle is equilateral, scalene or isosceles triangle.
6. If the marks of A, B and C are input through the keyboard, write a program to determine the student scoring least marks.
7. Given a point (x, y), write a program to find out if it lies on the x-axis, y-axis or at the origin, viz. (0, 0).
8. Given three points (x1, y1), (x2, y2) and (x3, y3), write a program to check if all the three points fall on one straight line.
9. Write a C++ program to input any character and check whether it is the alphabet, digit or special character.
10. Predict the output:

```
int main() {  
    int a = 500, b, c ;  
    if ( a <= 400 )  
        b = 300 ;  
        c = 200 ;  
    cout << "value of b and c are respectively " <<b<<" and " << c ;  
    return 0;  
}
```
