

Questions

1. Write a program to find the product of two numbers using pointers.

2. `int *p, q;`

- p is a pointer and q is an integer.
- p and q both are pointers.
- P and q both are integers.
- Syntax is incorrect.

3. Find the output of the following code snippet.

```
int a = 10, b = 20;
int *ptr = &a;
b = *ptr + 1;
ptr = &b;
cout << *ptr << ' ' << a << ' ' << b;
```

- 11 11 10
- 10 10 10
- 11 10 11
- 10 11 10

4. Find the output of the following code snippet.

```
int a = 15, b = 20;
int *ptr = &a;
int *ptr2 = &b;
*ptr = *ptr2;
```

- ptr now points to b
- ptr2 now points to a
- a gets value of b
- b gets value of a

5. Is the following program snippet correct?

```
int a = 10, b = 20;  
int *ptr;  
*ptr = 5;
```
